

# SMART FAÇADE FOR SMART BUILDING

**ALUGLASS**  
ARCHITECTURAL SYSTEM

The logo for ALUGLASS ARCHITECTURAL SYSTEM features a stylized graphic of two building facades with horizontal lines, rendered in shades of blue and green. Below the graphic, the word "ALUGLASS" is written in a bold, sans-serif font, with "ALU" in orange and "GLASS" in blue. Underneath, "ARCHITECTURAL SYSTEM" is written in a smaller, green, sans-serif font.

# **ABOUT OUR COMPANY**

**WELCOME TO ALUGLASS  
ARCHITECTURAL SYSTEM**

# ABOUT US

## “Founded in July 2016, ALUGLASS ARCHITECTURAL SYSTEM

Formerly Alufab Arch India—was Established With A Bold Vision: To Redefine How Façades Express Architectural Identity. Today, We Deliver High- Performance Systems That Seamlessly Blend Precision Engineering With Design Elegance.”

We specialize in:

- Custom façade solutions for residential, commercial, and institutional projects
- Sliding glass systems, partitions, and curtain walls
- Aluminum-glass integrations that balance aesthetics with durability

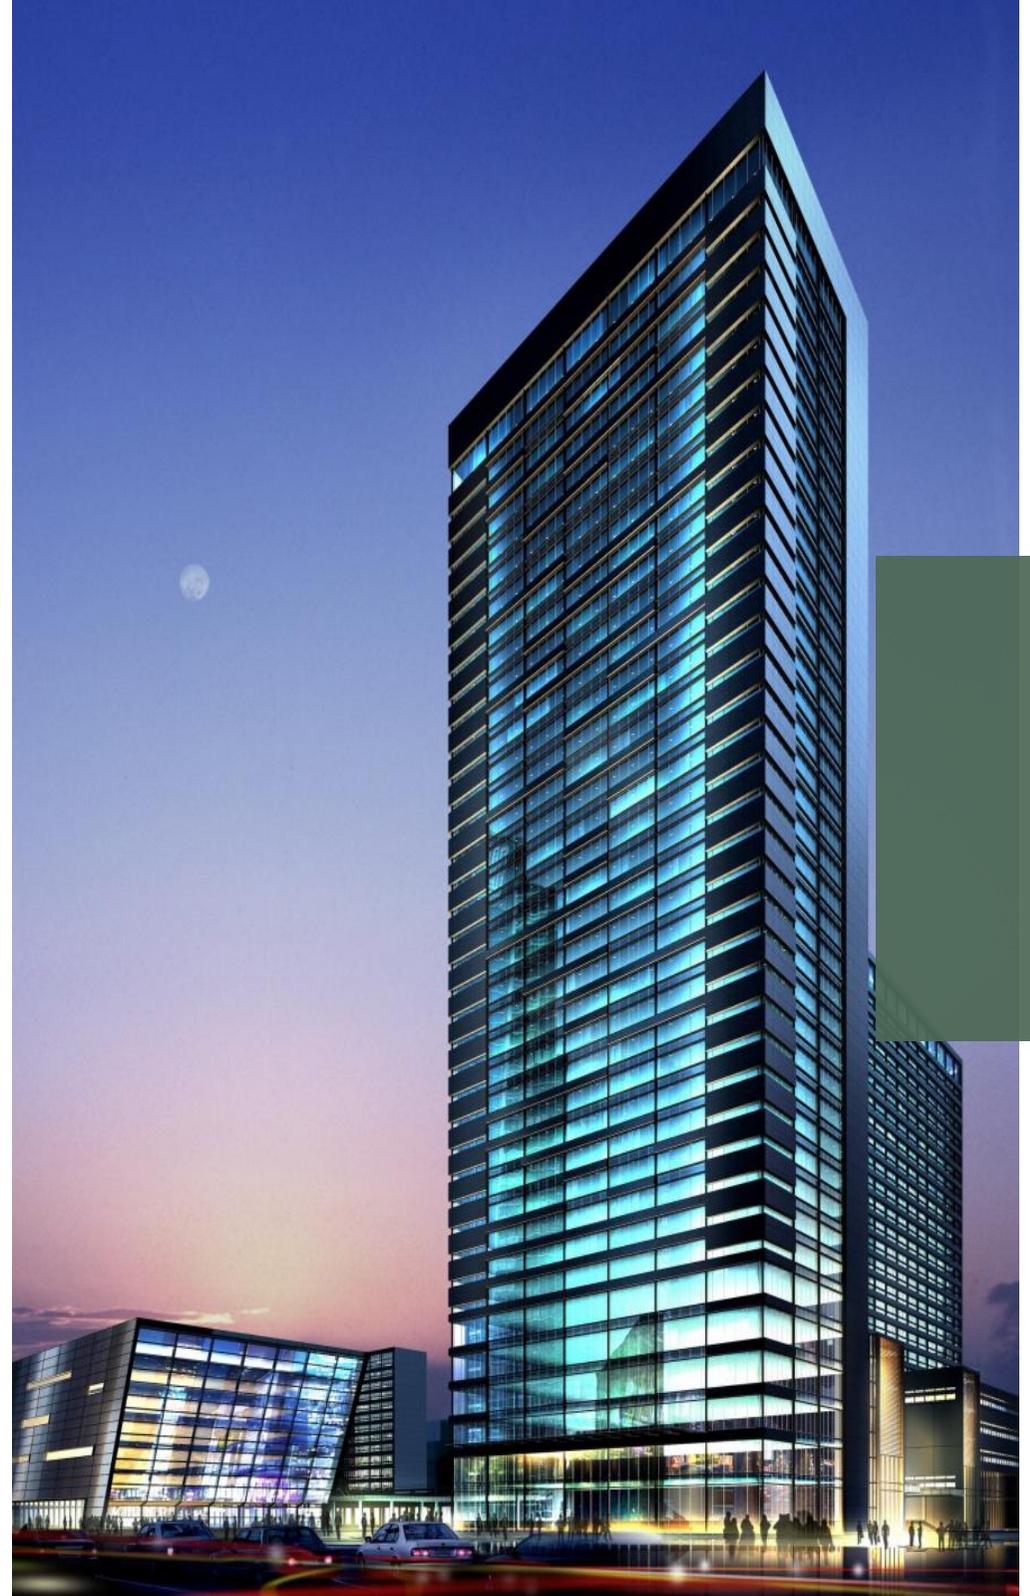

Our systems are designed to meet the evolving demands of modern architecture—whether it’s energy efficiency, acoustic performance, or minimalist design.

### What Sets Us Apart

- Design-Driven Engineering: Every product is crafted with architectural intent and technical excellence.
- Client-Centric Approach: We collaborate closely with architects, designers, and developers to deliver tailored solutions.
- Sustainability Focus: Our materials and systems support green building practices and long-term performance.

### Vision

To become a trusted partner for architects and developers seeking façade systems that elevate both form and function.

**OUR  
FACTORY  
SETUP**

**End milling machine**

**Advance CNC milling machine**

**Precision Cutting (single Head Machine)**

**Finishing & Assembly (Glazing Machine)**

**Precision Cutting (Double head Miter saw)**

**Advance CNC Double Head miter saw**

# OUR PHILOSOPHY

## MISSION

To deliver cutting-edge façade and glass systems that elevate architectural expression, combining precision engineering with timeless design. We strive to empower architects, designers, and developers with solutions that are sustainable, functional, and visually compelling.

## VISION

To become a leading name in architectural systems recognized for redefining building exteriors with smart, elegant, and performance-driven façades. We envision a future where every structure we touch reflects innovation, integrity, and inspired design.

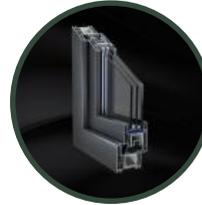

## VALUES

We value innovation, precision, and integrity—delivering sustainable, designforward façade systems. Our customercentric approach and collaborative spirit ensure every project reflects excellence, trust, and a bold architectural vision.

# UNITIZED GLAZING

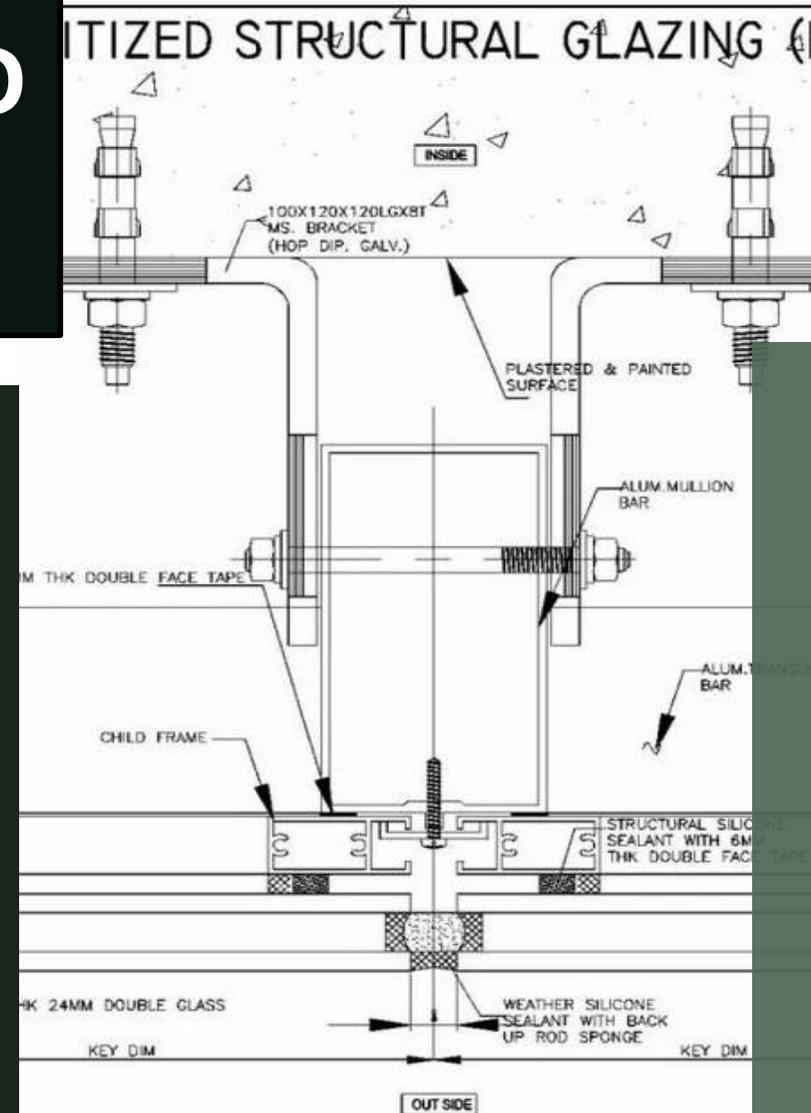

Unitized curtain walls stand as the preferred choice among design and engineering experts for large-scale, high-exposure buildings due to their technical superiority. These curtain walls are typically factory-fabricated and glazed, accommodating various opaque materials. The factory assembly minimizes on-site labour, elevates curtain wall quality, and accelerates the building's enclosure process.

## Unitized Glazing

# SEMI - UNITIZED GLAZING

Semi-unitised curtain wall systems offer cost advantages for smaller projects or larger ones with numerous wall configurations. These systems typically consist of vertical and occasional horizontal elements that support preassembled, pre-glazed vision and spandrel panels. The opaque sections can incorporate various materials such as glass, metal, earthy substances, and composites.

## Semi-Unitized Glazing

# STONE CLADDING

Stone cladding refers to a slender sheet of actual or simulated stone that is affixed to a structure constructed from materials other than stone. It is occasionally used in the architectural design of concrete and steel buildings from the outset.

## TYPE OF CLADDING

Stone, Granite, GFRC

## Stone Cladding

# SPIDER GLAZING

Spider glazing constitutes a significant concept for facade and elevation glazing, utilising a spider glass hardware. Structural support For spider glazing can be derived from the building's existing structure, while for larger elevations, it is necessary to establish structural support using mild steel or stainless steel

## Spider Glazing

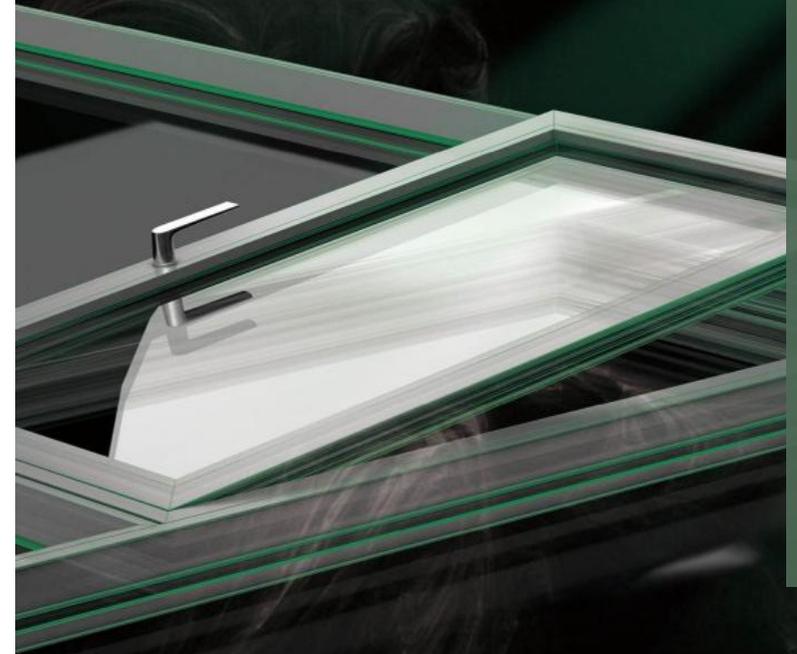

# DOORS AND WINDOW

Aluminum doors and windows offer sleek design, durability, and low maintenance. Resistant to corrosion and weathering, they ensure longlasting performance. Their slim profiles allow maximum natural light, enhancing aesthetics and energy efficiency. Ideal for modern architecture, aluminum frames blend strength with style, making them a smart choice for contemporary spaces.

## Doors & Windows

### CASEMENT WINDOW

# METAL CLADDING

Cladding involves the joining of dissimilar metals, distinguishing it from fusion welding or adhesive Methods for metal fastening.

Typically, cladding is accomplished by extruding two metals through a die or pressing and rolling metal sheets together at high pressure.

## TYPE OF CLADDING

### **Metal Cladding –**

# OUR TEAM

## HARIOM GUPTA

Hariom, a graduate with extensive experience in façade systems, serves as the dynamic Director of the company. With a strong foundation in architectural

design and execution, he leads with precision, creativity, and strategic insight. His expertise spans residential, commercial, and institutional projects, ensuring every façade solution is both functional and visually striking. Hariom is known for his customer-focused approach, seamless coordination with architects and contractors, and commitment to quality and innovation. Under his leadership, the company continues to deliver cutting-edge façade solutions that elevate architectural identity and exceed client expectations. His vision drives excellence in every detail.

DIRECTOR

## RAKESH PAL

Rakesh professional journey beginning in the aluminum and glass industries and evolving into façade installation. Since 2010, he has brought deep expertise to every project, specializing in planning,

engineering, and delivering high-quality, aesthetically refined façade systems that enhance architectural integrity. Rakesh is known for his honesty, accountability, and client-centric approach. He fosters a culture of trust, fairness, and mutual respect, treating everyone with dignity. His leadership style empowers teams, encourages collaboration, and promotes a positive work environment driven by creativity and innovation—making him a respected figure in the façade industry.

DIRECTOR

## RUPESH MAHADIK

Mr. Rupesh is an expert in sales and marketing with a proven track record of driving revenue growth and building strong client relationships. He excels in developing strategic sales plans, leading teams, and executing marketing campaigns

that deliver measurable results. With deep industry knowledge and excellent communication skills, Rupesh consistently exceeds targets and fosters customer loyalty. His passion for innovation and customer-centric approach makes him a valuable asset to any organization seeking to expand its market presence and achieve sustainable business success.

BUSINESS DEVELOPMENT MANAGER

## RUPESH PAL

An experienced entrepreneur with a diverse background in management, consultancy, and operations across multiple industries. He excels in overseeing operations through effective people management and process optimization. His core strength lies in driving

organizational growth and efficiency. Raised in a disciplined environment with an army background, he developed independence, determination, and assertiveness early on. Inspired by his mother's balance of work and life, he became a serial entrepreneur, starting young with home tuition and coaching. He further enhanced his self-belief.
